TEST PACKAGES

WG1 Greenhouse Quality Control	Electro-Conductivity (EC), pH											
WG2 Fertigation Solution	WG1 + Nitrate + Nitrite-N, Chloride, Sulfur (as S04), Phosphorus, Phosphorus (as H2P04), Potassium, Magnesium, Calcium, Sodium, Hardness, Total Dissolved Solids, Total Alkalinity											
WGB Fertigation Solution with Micro	WG1 + WG2 + Zinc, Manganese, Copper, Iron, Boron, Molybdenum, Ammonia/ Ammonium-N, Silicon											
WGC Fertigation Solution Complete	WG1 + WG2 + WGB+ Carbonate, Bicarbonate, Aluminum, SAR, Adjusted SAR, pHc, Residual Sodium Carbonate, Saturation Index, Summation of Cations + Anions											
MICROWMM Microbiological Scan	Heterotrophic Plate Count, Total Coliform, E.coli, Salmonella spp. Total Yeast & Mold, Bile Tolerant Gram Neg. Bacteria, Staphylococcus aureus, Pseudomonas											
HCPESTM	Health Canada Pesticide Scan (96 Analytes)											
Fertigation Schedule & Crop	Fertigation Schedule:	A: Slab Saturation B: 4-6 weeks after planting C: Normal Feed D: Heavy Fruit Load					Crop Type:	A: Tomato B: Cucumber C: Pepper D: Lettuce E: Cannabis F: Hemp
